Dear Paul

I would like to write on behalf of NHBST and all the patients that use Plasma for Medicines, to extend heartfelt gratitude and recognition for both your continued plasma donations and your outstanding advocacy for donation.

I am aware that you have been selflessly donating for almost 37 years and this act of your generosity has made a significant impact on the lives of those in need and it is with great admiration that I acknowledge your contribution.

Your commitment to helping others exemplifies the highest standards of compassion and community service. It is through the efforts of dedicated donors like yourself that we can offer hope and healing to countless individuals and their families.

On behalf of our entire organisation, I want to express our deepest appreciation for your generosity. Your contribution is a testament to the power of giving and the profound difference one person can make in the lives of many.

We are planning to build more plasma clinics across the country and the basis for this expansion is the success of the initial three centres – you have played a key role in laying the foundations for success.

Thank you once again for your invaluable support and for being a beacon of hope in our community.

sincerely

Gerry Gogarty
Director - Plasma for Medicines
